## First Attempt for a List of the Patronyms in the Lepidopterology based upon the Info-System of the Cesa

Muhabbet Kemal Koçak Ahmet Ömer Koçak

**Abstract:** First attempt for a list of the patronyms in the Lepidopterology based upon the Info-System of the Cesa. *Cent. Ent. Stud., Priamus Suppl.* 12: 1-89, fig. The present publication is the first attempt in preparing a comprehensive list of the patronyms among the genus- and species group names in the Lepidopterology. Totally 5175 patronyms of the Lepidoptera, found especially in the Old World are listed alphabetically under the related families. Preliminary evaluations on the patronyms of 17 selected authors are made. Valid patronyms in the species group taxa of the following authors recorded in the Cesa Databank are listed and their numbers are discussed: Herbulot (42), Staudinger (59), Meyrick (7), Hampson (27), Butler (22), Boisduval (20), Guenée (8), L.B.Prout (22), Ragonot (7), Jackson (43), Trimen (20), Sattler (2), Amsel (47), W.Warren (8), Walker (15), Hewitson (12), and Moore (22).

**Keywords:** Patronyms, Lepidoptera, List.

Etymological studies on the Lepidoptera based upon the Info-System of the Cesa have been carrying out by the authors. Within this program, vernacular names in Turkish, Uighurian and English were published recently in various serials of the Cesa.<sup>1</sup> Further results on this subject will be published at irregular intervals.

The present publication is the first attempt in preparing a comprehensive list of the patronyms among the genus- and species group names in the Lepidopterology. In the literature, there is no detailed survey on the patronyms of the Lepidoptera. Using the temporary information of the Databank of the Cesa, the authors put together totally 5175 patronyms of the Lepidoptera for the present publication, found especially in the

Old World. Although the selected specific names are not concluded, we believe that the present knowledge submitted below, will contribute remarkably to the researchers interested in the patronymy for their specific papers or internet sites.

## Preliminary Evaluations on the Patronyms of Some Authors

The following information is obtained from the Databank of the Cesa, comprising 93565 records (61499 species, 22644 subspecies, 8487 genus-group names, and 933 family group names). However, examples of the patronyms in the genus group names are omitted for the time being.

Selected 17 authors are from various nationalities, i.e. from England (9), Germany (2), France (4), and South Africa (2). Although British authors described many new species /subspecies to the science, we find the dedicated scientific names by other authors to them much less than expected. In other words, e.g. Meyrick described 6038 taxa (according to our present knowledge). Validly dedicated species to Meyrick are apparently only 7. We calculated rates for the selected authors, which are mentioned above in blue colour. The result is very remarkable. Our temporary interpretation is, South African lepidopterists consider important dedicating their new taxa to the acquainted authors. Patronymy is apparently more appreciated in Africa than in Europe (see the Graph below).

**Priamus** is the first international serial publication of the Centre for Entomological Studies Ankara (CESA), established in 1981. It appears in volumes at irregular intervals. It includes shorter original articles of the research workers of the Centre, regarding taxonomy, nomenclature, morphology, bibliography, check-list, catalogue of Insects, especially Lepidoptera, as well as papers on faunistic, ecological and distributional researches. The publication languages are Turkish, English, German and Uighurian.

**Priamus Supplement** is the first international, electronical publication of the Centre for Entomological Studies Ankara (CESA), established in 2006 in accordance with the Publications Rules of the ICZN. It appears at irregular intervals as PDF format and announced in the internet site of the CESA. It includes larger original articles and theses of the research workers of the Centre, regarding taxonomy, nomenclature, morphology, bibliography, check-list, catalogue of Insects, especially Lepidoptera, as well as papers on

faunistic, ecological and distributional researches. The publication languages are Turkish, English, German and Uighurian.
